

## PRODUCT PROPOSAL

# Your dead leads are revenue waiting to be unlocked.

ReviveIQ is an AI-powered engine that scores your cold leads by revival likelihood — so your calling team always knows who to call first, and why.

**1,000+**

Dead leads in the average sales database

**3–5x**

Higher conversion on warm vs cold calls

**₹0**

Extra spend to recover leads you already paid for

## The problem every sales team has

**TODAY — WITHOUT REVIVEIQ**

- ✗ 1,000+ dead leads dumped with zero priority
- ✗ Agents call cold with no context or brief
- ✗ Hot leads buried at the bottom of the list
- ✗ Leads slip through — never contacted at all
- ✗ Revenue leaks every month, silently

**WITH REVIVEIQ**

- ✓ Every lead scored 1–10 by AI, ranked instantly
- ✓ Score reason tells agent exactly why to call
- ✓ Hot leads surface to the top automatically
- ✓ Weekly re-score keeps the list current
- ✓ Recovered revenue from leads already acquired

## How it works

**01****Connect your CRM**

HubSpot, Salesforce, Pipedrive, Zoho, Teamgate. Dead leads pull in automatically.

**02****AI scans the web**

Live search for funding rounds, hiring signals, and intent data per lead.

**03****Every lead scored**

Revival score 1–10 with a plain-English reason for the score.

**04****Team calls in order**

Hottest leads at the top. Manager sees ranked list. No guesswork.

The scoring model

Each lead is scored across four dimensions using CRM history, then boosted by live web intelligence. Fully transparent — every score comes with a reason.

8–10

HOT

Call this week

5–7

WARM

Call this month

1–4

COLD

Low priority

| SCORING DIMENSIONS                           | WEB INTELLIGENCE SIGNALS (LIVE) |
|----------------------------------------------|---------------------------------|
| Recency — how long ago cold0–3 pts           | Funding raised recently+2       |
| Cold reason — budget vs rejected0–2 pts      | Evaluating similar tools now+2  |
| Budget signal — amount mentioned0–2 pts      | Hiring for relevant roles+1     |
| Engagement — demo'd, was close0–1 pt         | Reviewed G2 / Capterra+1        |
| Web boost — funding / intent signals+0–3 pts | Company expanding / growing+1   |

Build plan — 4 phases

- 1

Foundation — Auth + Database persistence

Clerk login, Supabase database. Leads and scores saved permanently. Per-user data isolation.
- 2

Scoring engine — Python FastAPI pipeline

Parallel enrichment (Tavily) + scoring (Claude AI) for 1,000+ leads in under 30 seconds.
- 3

Automation — Weekly re-score + email alerts

Leads re-scored every week with fresh web data. Manager gets digest + instant alerts when scores jump.
- 4

Calling AI — Warm-up messages + call briefs (later)

Automated WhatsApp, personalised call briefs, auto CRM push after calls. Phase 2 of the product.

| PRICING MODEL                  | GO-TO-MARKET                 |
|--------------------------------|------------------------------|
| Free100 leads / month          | PilotOwn sales team first    |
| Pro1,000 leads / month         | TargetRecover 10–15 deals    |
| ScaleUnlimited                 | ThenCase study → outbound    |
| Strategy% of recovered revenue | ICPSales teams, 50–500 leads |
